

## Walter F2334 round insert cutter

With its round inserts with location flats and stable seating, the F2334 round insert cutter ensures maximum feed rates and cutting performance, particularly when roughing difficult-to-cut materials, such as titanium alloys. The Walter copy mill boasts impressive performance and precision, not only for HSC machining.

### Facts and advantages:

- > round inserts with location flats ensure highly stable insert seating
- > ideal for maximum feed rates and cutting efficiency
- > ideal for roughing operations and difficult-to-machine materials
