

Walter Xtra•tec® F4030 high performance mill

Walter's Xtra•tec® F4030 high performance mill is a shoulder, plunge and copy mill with double-sided Trigon insert. The indexable inserts with 6 usable cutting edges offer the greatest process reliability thanks to their negative basic shape and positive, soft cutting action. Feed per tooth rates up to f_z 3.5 mm are possible.

Facts and advantages:

- > high metal removal rate thanks to the combination of low cutting depths and high feed per tooth rates
- > high degree of process reliability thanks to low risk of vibration tendency of long tools and stable insert
- > reduced process costs with Tiger•tec® Silver cutting tool material and 6 cutting edges per indexable insert
