

Walter Xtra-tec® F4042 shoulder mill

The Walter Xtra-tec® F4042 shoulder mill is a highly positive tool for roughing and finishing. Five insert sizes are available for tools with a diameter from 10 mm to 160 mm. Thanks to its highly positive, spiral geometry, the Xtra-tec® F4042 shoulder mill offers extremely stable cutting and excels through its low power consumption.

Facts and advantages:

- > high metal removal rate, even on low-performance machines, thanks to the positive and soft cutting action
- > reduced machining costs due to shoulder-free milling
- > reduced inventory costs thanks to ideal adaptation of the tool to various materials and the variety of geometries and cutting material grades available
